OVERVIEW

What it is

Built on Isekai

Every number comes from Isekai RPG Leveling: level, rank, INT and WIS. The mod adds no levelling of its own.

Three classes of power

Tier Magic for any caster, plus two one-per-colony classes: **The Geass** and **The Almighty**.

Extras

Enemy casters, summons with their own races, **soul guardians**, and a full spell-effects system.

HOW TO PLAY

Getting started

1

Select a colonist

Press the Grimoire button

2

Pick a path

Arcane · Divine · Spiritual

3

Learn spells

3 per Isekai level, max 300

4

Tick “Prepared”

They become ability buttons

Dev mode adds a **Dev: Overlord** button for testing. Hold **Shift** to aim a harmful spell at an ally.

TIER MAGIC

Tiers unlock with Isekai level

158 spells from 0th to 10th tier plus 7 Super-Tier. Level 401 is Isekai’s SSS rank, which Isekai already titles **“Overlord”**.

TIER MAGIC

Three caster paths

Arcane

Powered by INT

Destruction, necromancy, death magic, undead, space and time.

Divine

Powered by WIS

Healing, resurrection, holy damage, angels, protection.

Spiritual

Powered by WIS

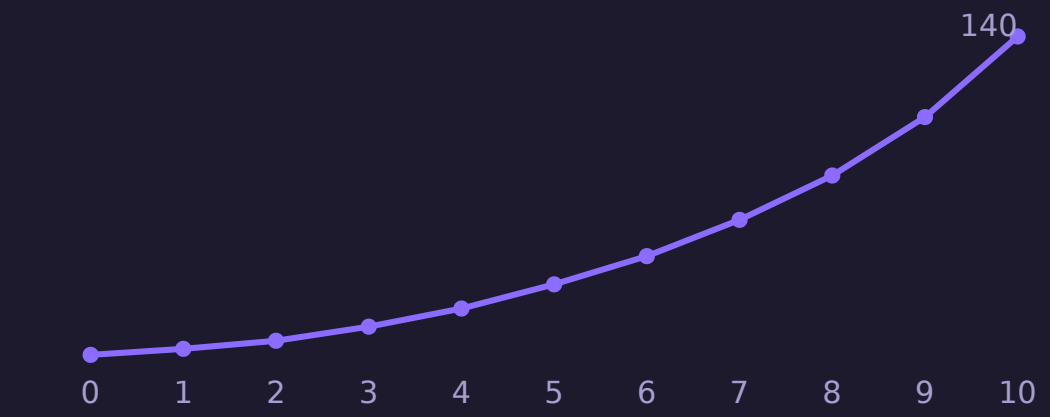

Weather, earth, nature, beasts, elemental forms, group heals.

Each spell lists which paths can learn it. Utility spells are open to all three.

Six toggles on the caster. They stack and apply to every tier spell, never to Super-Tier.

TIER MAGIC

Rank decides what lands

Gap = caster rank − target rank (+1 with Penetrate). Rank comes from Isekai. Equal-rank targets resist death and take damage and a stun instead. Aiming previews colour targets by this chance.

EFFECTS

Every spell has its own visuals

Casting circles grow with tier, projectiles fly with trails, then blasts, pillars, portals and real lightning. Everything drawn on the map costs two draw calls. Switch effects off or set camera shake (0–200%) in Mod settings.

SUMMONS

Summons with their own bodies

Angel Guardian

Archangel Flame

Dark Young

Death Warrior

Dire Bear

Dominion Authority

Doom Lord

Flame Warg

Giant Spider

Heavy Skeleton

Imp

Primal Beast

Principality

Seraph

Skeleton Warrior

Spirit Wolf

Zombie Hound

Summons fade when the spell ends and never cause “colonist died” grief. One army at a time. A **Command summons** button orders them. Each body has north, east and south views.

10TH TIER · ARCANE · 140 MP

Time Stop

Entry
violet tint, expanding ring

12 seconds
every thing except the caster stops ticking · weather and wind pause · damage is held

Exit
collapsing ring, held damage lands

Beings ranked above the spell keep moving. Instant-death spells still kill at once. A countdown shows at the top of the screen.

ONE PER COLONY

The Geass

Contract · Stage 2 · Second eye · Always

Don’t move

Give me

Forget

Die

Fight

Live!

Reset

Command the World

Obey me

Mass command

Move the pieces

According to plan

The target must see him, be awake and have uncovered eyes. **One Geass per person, ever** — even a resisted order uses it up.

RUNAWAY · SECOND EYE · HER WISH

The Geass story

1 · Runaway

The Geass grows with every command. Once full it can’t switch off. A **lens** blocks it; without the lens, chatting can become accidental commands.

→

2 · The second eye

At rank S, Command the World wakes it. Obey me, Mass command and the board unlock.

→

3 · Her wish

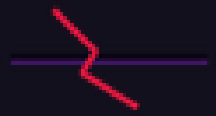

Take C.C.’s Code: Geass gone, no aging, dormant for 2 days instead of dying. Refuse: she stays, MP regen +10%.

Black King’s mask
allies within 10 cells aim and move faster

Chess
a letter 3 h before each raid

Geass Canceller
about 1 in 50 hostiles carries one

ONE PER COLONY · FUTURE SIGHT

The Almighty

Abilities

Foresee and dodge blows, rewrite futures (Look Back / Look Ahead), copy abilities that would have hit you, plus Burner Finger, Galvano Blast, Freund Schild, Iron Skin, Jail, Fear, Weak Point and Miracle.

Schrift letters

Gift of Power hands out up to eight letters. **Auswählen** takes them back anywhere. **Schatten** steps you beside any letter holder, even in a caravan.

Death while The Almighty is open can leave a pool of foresight that brings the pawn back. Isekai rank decides how far each ability reaches.

FROM DEATH TO SPIRIT BODY

Souls and guardians

Catch the soul
within half a day of death

→

Extractor
automatic, never fails

→

Soul storage
holds bottles

→

Transformer
binds soul to statue (1 day)

→

Guardian statue
manifest: 2 h, 800 MP, 4,000 W

Soul batteries
1,000 / 3,000 MP

Invigorator
revive a worthy soul (7 days)

Spirit body
see-through, mana blue, half their level. Copies name, traits, skills, passions, path and spells, plus gear that can’t be dropped. Loses ~96 MP a day; at 0 MP it returns to the statue.

SOULS

Three kinds of guardian

Kind	Who	Works	Social	Revivable
Worthy soul	Worthy-soul trait, rank A+	Everything	Yes	Yes
Superior	Every usable skill 15+, rank A+	Everything	No	No
Bound	Skill 20, 50 kills, researcher, crafter, high average	Only bound skills	No	No

Rank A is Isekai level 51+. Research chain: soul scooping (600) → engineering (2,500) → transformation (4,000) → invigoration (7,000). A fallen guardian is saved if the statue is above half durability; below that the statue shatters.

HOSTILE HUMANS

Enemy casters

Who

Hostile humanlikes of **rank C or higher** get a path, mana and a spell build of their own. They cast attacks and support only and pick their own targets.

Animals, insects and mechs are not included.

What you can switch

High-quality spell effects · buff and debuff visuals · aiming previews · camera shake · the Schatten laugh · small class buttons · Isekai aura pressure · Cruel runaway · Code ending.
